New York, July 28.—So decided was the change in stock market conditions as a result of the cessation of liquidation by the Research Ferrouber and learning that the conditions are suit of the cessation of liquidation by Eric 24 pfd. the Pearson-Farquhar syndicate that to- Great Northern pfd..... day the greatest danger of trouble arose from fears of a bear panic. Following yesterday's brisk recovery in prices, the London market for American stocks was very much stronger this morning, and the opening here was both strong and M., S. P. & S. S. Prices Move Up. After this tumultuous opening, prices moved up sharply, and there seemed about to be a stampede among speculators short of stocks when at about the close of the first hour stocks were supplied to them, seemingly from such important quarters from which stocks are portant quarters from which stocks are often taken for support in times of market weakness. Subsequently the market steadled, and in the early afternoon sold off a bit from the best sugar.

London buying was a distinctive feature of the outside demand, and including to-day's purchases that city has taken more than \$15,000,000 in stocks in the last three market sessions,

The range of prices at the close showed that the market had recovered considerably more than the losses sustained in the first two days of the week, heavy though these losses were.

Market Is Oversold.

Every circumstance affecting the technical position of the market and every news development of the day was conducive to higher prices. It was known before to-day that a heavy short interest existed, for in speculative circles nothing but extreme pessimism had been listened to for a week, but it was not expected Tennessee Copper. 22% U. In the new investment and speculative buying which appeared the principal stimulus was the settlement of the troy.

stimulus was the settlement of the troubles of the Pearson-Farquhar syndicate, and it was evident, as additional details came to light, that the importance of this event had not been overestimated. Not only does the settlement relieve the market from the danger of a torrent of liquidation, but it also does away with a threatened railroad war, which was projected by the ambitious leaders of the syndicate.
